

Project Manager – Digital Solutions

Are you looking to grow your career in project delivery within innovative, tech-led infrastructure solutions?

We're looking for a proactive and organised Project Manager to join our Digital Solutions team on a 6 month fixed term basis with the possibility to extend, supporting the delivery of cutting-edge software and engineering projects that serve utilities and smart metering sectors across the UK and beyond.

We recognise our employees are our most important and greatest asset, and we understand that we could not accomplish what we do every day without our valued team.

We offer a salary of £47,000 per annum, annual bonus, company car, 1% benefit allowance, pension, 36 days annual leave including bank holidays - rising to 38 days after 3 years of service, enhanced parental leave, life assurance, salary sacrifice schemes and more.

What will I be doing?

You'll lead the end-to-end management of digital infrastructure and engineering projects, ensuring successful delivery, clear communication and efficient coordination.

Key responsibilities include:

- Managing multiple concurrent projects from post-sale to final delivery.
- Coordinating software deployment, smart metering rollouts, and engineering initiatives.
- Creating and maintaining project plans, timelines, and RAID logs.
- Collaborating with UK-based and international teams (France, US, NZ).
- Reporting risks and progress to programme boards and leadership.
- Supporting cost management, invoicing milestones, and budget adherence.
- Ensuring consistent alignment with customer expectations and commercial priorities.
- Participating in international calls when needed, occasionally outside standard hours.

This is a full-time, Monday to Friday, hybrid working role – predominantly home working with some travel required across the UK and Ireland as well as occasional international travel.

What are the requirements?

- Experience in project delivery—ideally as a Project Manager, Product Owner, or PMO.
- Understanding of complex engineering or software projects (entry-level welcome if supported by transferable experience or aptitude).
- Confident communicator, comfortable working with both technical teams and senior leadership.
- Organised, methodical, and able to manage competing priorities.
- Ability to produce and manage RAID logs and structured project documentation.
- Comfortable with occasional non-standard hours to support global collaboration.
- Proactive mindset with a flexible, hands-on approach to delivery.
- Project management qualification (e.g. PRINCE2 Agile) is desirable.
- Background in water, utilities, or infrastructure sectors is a plus.

Who we are

SUEZ is a major player in environmental services. For almost 160 years, SUEZ has supported local communities and industrial companies in the management of essential services such as water, waste, and air quality. As such, SUEZ produces drinking water for 66 million people worldwide, recovers 2 million tons of secondary raw materials per year, and generates 3.1 TWh of renewable energy from waste.

SUEZ Digital Solutions, a SUEZ subsidiary, is committed to improve the environmental and economic performance of water & waste industries by leveraging the expertise of SUEZ Group through data analytics and AI. The 700+ experts of SUEZ Digital Solutions design, develop, deploy smart water and smart waste solutions worldwide.
